

ROLL CASE PACKER

RCP-8

RCP-8 is extremely flexible case packer for variety of different tissue products. Among other products from tissue industry it can handle packaging of toilet rolls and kitchen towels in carton boxes in very wide range of pack configurations. With format changeover time below 10 min it is one of the most efficient case packers on the market. In operations it can reach the speed of up to 8 boxes / min, depending on packing configuration!

CHARACTERISTICS

Mechanical speed	10 cycles/min
Max production speed	up to 8 box/min
Format changeover time	10 - 15 min
Box width	240 – 480 mm (9.4" - 18.9")
Box length	360 – 650 mm (14.2" - 25.6")
Box height	240 – 600 mm (9.4" - 23.6")
Box sealing type	sealing tape
Box feeding	automatic
Infeed type	single arm diverter
Machine height at infeed	835 mm (32.9")
Machine height at discharge	1240 mm (48.8")
Air consumption	< 250 l/min
Installed power	10 kW
Real power consumption	< 4 kW
Machine weight	6520 Kg

OPTIONS

_____	Dual arm infeed
_____	Hot-melt box sealing
_____	Label applicator
_____	Inkjet printer
_____	Box handling devices
_____	Additional KDF magazin
